Ant Control Service Program: **The Pest Free Living Solution!**

Absolute pest control will inspect and treat around your house perimeter. The entire front and back yard and eliminate all the ant activity, nests and hills.

We will always try to solve your ant problem without applying insecticide in your house by eliminating the nests on the exterior. If however you continue to see ants inside we treat inside you house.

The treated areas will be safe for your children and pets as soon as the chemical is dry, we recommend about 4 hours before using treated areas after application. We use a backpack application sprayer that allows us to apply the insecticide exactly and only where needed. We don't want to contaminate your environment unnecessary.

We can guarantee our work for 3 month!

If the ants come back, so do we.

The cost is \$ 265 +GST.

This amount will allow us to use up to 15 liters of prepared insecticide. If more is required an additional charge will apply.
